

RECONDITIONED PREPAYMENT FERRANTI COIN METER

Changing the coin action

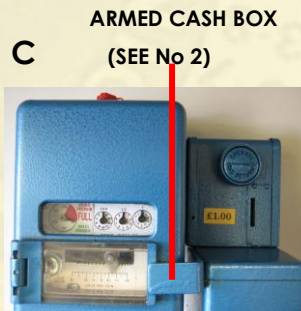

1. Remove the cash box
2. Unscrew the knurled nut) see picture
3. Push lever towards rear of the meter) to right
4. Pull the coin action to the right to remove it from the meter
5. Simply reverse these instructions to replace coin action

Altering the units per coin setting

The Ferranti meter has a variable tariff based on units per coin (separate information sheet available on how to convert units per coin to pence per unit). As a guide we set our £1.00 coin meters at 8 units per coin which is the equivalent of 12 pence per unit of electricity. To alter the units per coin setting:-

1. Break the yellow seal (See pictures A & B) on the hinged large (A) or small (B) window and open the window or;
2. If you have a small window with an armed cash box you will need to remove the cash box and undo the screw under the arm to open the window (See picture C)
3. Gently pull the pointer towards you then up (See Picture A) slide it to the desired setting and then press it gently back into the mechanism
4. **Do not press the black plunger** because you will lose any credit on the meter
5. Close the window and reseal with a yellow meter seal or replace the armed cash box
